M Short Throw Series
M300XS and M300WS digital projectors

Easy to use and at the right price, M Short Throw Series projectors provide all the essential features that you need to connect with your audience.

**ESSENTIAL FEATURES FOR EDUCATIONAL FACILITIES**

- **Plug and Play** intuitive setup and operation
- **Bright images** easily viewed in any application
- **Versatile, color-coded connections** to computer, video sources and external monitor
- **Automatic keystone correction technology** instantly projects a square image even when the projector is set up at a steep offset angle to the screen
- **Autosense™** intuitively syncs the projector with most computer signals and features one-touch image optimization
- **One-touch source changes and complete menu control** using the intuitive projector keypad
- **Powerful 10-watt speaker** provides volume needed for large rooms
- **Remarkable contrast ratio (2000:1)** enhances your image
- **With XGA and WXGA native resolutions**, high brightness up to 3000 lumens and patented NEC technologies, M Short Throw Series projectors display impressive image quality

**Virtual Remote™ (DDC/CI)** over the VGA cable to control the projector directly from a computer without the need for additional control cables.

**Top cover lamp change** provides for easy lamp changes without removal of the projector from the mount.

**Built-in wall color correction presets** provide for adaptive color tone correction to display properly on non-white surfaces.

**Short throw creates a 110” diagonal image from 3 feet, 6 inches, eliminating shadows on the screen along with projected light in the presenter’s eyes created by traditional front projection systems**

On a green wall...

BEFORE auto wall correction

AFTER auto wall correction
DESIGNED WITH THE ENVIRONMENT IN MIND

- **Extended lamp life with ECO Mode™ technology** increases lamp life up to 5000 hours, while lowering power consumption
- **Power management** enables projector to automatically turn off when an incoming signal is not detected from any of the inputs
- **Auto Power On** via the RGB (15-pin) input connector when a signal is detected from a computer
- **Carbon savings meter** calculates the positive effects of operating the projector in ECO Mode, which is encouraged by an optional message at startup. A green ECO Mode button on the remote control makes the switch easy.
- **Quick start (3 to 4 seconds)** lets you begin presenting in seconds while quick shutdown (immediate power off with no cooling required after shutdown) ensures efficient energy usage
- **Sleep timer** can be set to automatically turn off the projector at set countdown times
- **Low power consumption** (0.2W in stand-by mode) minimizes energy costs

**5000-hour filter life**
NEC is committed to designing its products to provide long lifecycles. This commitment even extends to components within its products, including the improved filter. This virtually maintenance-free filter reduces the frequency at which cleaning is required, thereby decreasing your total cost of ownership.

SOFTWARE FEATURES

**Geometric Correction**
Projecting an image isn’t confined to a standard flat screen or wall with the NEC M Short Throw Series. Geometric correction allows these models to project an image on spheres, cylinders, corner angles and many more non-standard surfaces.

**DICOM SIM**
DICOM Simulation enables users in medical environments to display accurate diagnostic images.

**Cornerstone**
Enhanced keystone correction allows for horizontal, vertical and diagonal image correction for aligned images even when the projector is set up at an angle to the screen.
GET CONNECTED WITH A WIDE SELECTION OF INPUTS

- **Dual computer inputs** ensure quick switching between presentations
- **Four audio inputs (two mini stereo, R/L and HDMI)** make it easy to add sound to enhance your presentations

Remote control
Easy control from remote allows you to adjust lamp mode, aspect ratio, volume and image all with the touch of a button.

**HDMI input**
Among the M Short Throw Series' wide selection of inputs is an HDMI w/HDCP for connecting to high-definition sources such as Blu-ray players, cable boxes, satellite receivers and personal computers.

Variable audio-out
This input enables the remote control to be used to adjust volume of self-powered external speakers that are connected to the projector. In standby mode, the audio-out stays active, allowing the last input used to pass to the self-powered external speakers.

USB View
In instances when you'd prefer to leave your laptop behind for a presentation, M Short Throw Series projectors can deliver a solution. Using the presentation conversion software included with your projector, simply place your file onto a USB drive and plug it into the projector's USB port. This allows you to display images stored as .jpegs from optional USB memory.

**USB input**
Your connection options go even further with the M Short Throw Series. Connect your laptop or PC directly to the projector using the USB port and a standard USB cable.

ADVANCED NETWORKING CAPABILITIES

- **Integrated RJ45 connection** for quick connection to the LAN (10/100 base-T capability)
- **Remote diagnostics** enable the user to monitor and make adjustments to the projector remotely
- **PC CTL 4.0** controls the power switching input selection and other functions while managing lamp usage and a variety of other vital information over the network. Email notification and projector scheduling for better asset management is included with the software.

Image Express Lite
Dedicated projector software provides wired and wireless data transmission via peer-to-peer or over the network.

Wireless LAN module (optional)
**UNIQUE FEATURES**

**Advanced AccuBlend** ensures detailed images when non-native resolution sources are connected to the projector

**Built-in closed captioning** enables decoding and display of text information from a video

**64-step image magnification** with location control

**Countdown sleep timer** can be set to automatically turn off the projector

**Direct power-off** provides instantaneous shutdown of projector

**WARRANTY**

Registered owners receive a 2-year parts and labor warranty including the first year of InstaCare. The lamp is covered for one year or 500 hours - whichever comes first. InstaCare provides the original owner one year of either limited 3-business-day repair/return or next-business-day exchange.

**IN THE BOX**

Remote control, batteries, power cord, RGB signal cable, built-in lens cover, user’s manual on CD-ROM, quick start guide, product registration card, security sticker
